

## BOX PALLET **TIPPER** FOR FOOD PRODUCTS

- ✓ Built entirely with AISI 304L stainless steel.
- ✓ Maximum load 1 T.
- ✓ Optimal product emptying.

# BOX PALLET TIPPER FOR FOOD PRODUCTS

## MODELS:

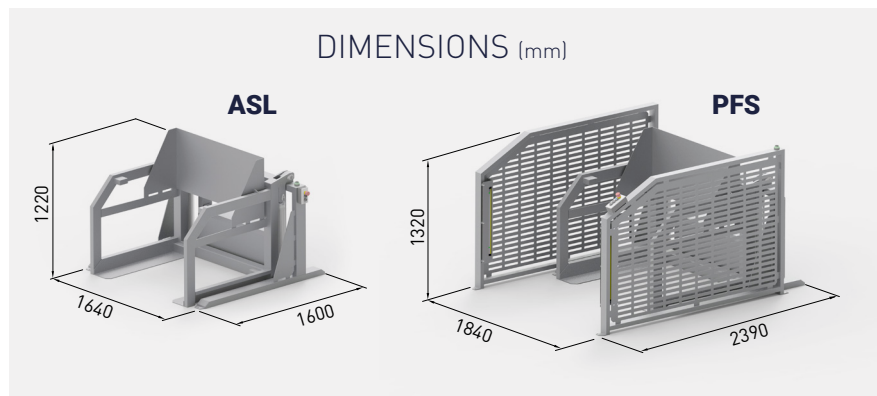

### PFS TIPPER

Side panels and fitted with photocell safety barriers.

### ASL TIPPER

No side panels, with audible/visual alarm device.

**Models that can be tailored** to the dimensions of the box pallet and desired working height.

## ADVANTAGES

- Maximises food safety as there is no product handling.
- Designed to gently tilt plastic box pallets containing food products.
- Facilitates emptying at an optimal working height, thus improving ergonomics.
- This significantly reduces the risk of injuries due to bad postures and repetitive movements.
- Improves productivity by automating the process.

## CHARACTERISTICS

- Built entirely in AISI 304L stainless steel.
- Sturdy construction and a design that facilitates perfect cleaning.
- Electro-hydraulic lifting system with single-acting cylinders and rupture safety valves.
- Equipped with a "hold-to-run" pushbutton control to ensure safe, easy-to-control tipping.
- Designed to achieve optimal product channelling when tipping.
- Bottom of tipper enables easy entry and exit of box pallets.
- Integrated control and operating mechanisms.
- Easy maintenance and repair.
